CYBER SAFETY COP

Cyber safety assemblies for students are age appropriate 40-minute interactive presentations for students K to 12th grade. They can be taught in small groups, a classroom, or in a auditorium to hundreds of students. All of our presentations address three key online safety issues all children experience:

- **Dangers of sharing personal information with strangers; anti-bullying strategies; and how to create a positive online reputation.**

- **Can be presented in-person, webinar, or view-on-demand.**

K - 3rd Grade

Our K - 3rd grade presentation, "Be Safe and Kind Online," equip younger students with the skills and knowledge necessary to use the internet safely, creating an awareness of potential problems they may experience when they are online, and how to manage these issues and ask for help. The topics are introduced by fun animated characters that children can enjoy and relate to.

4th - 6th Grade

The 4th – 6th grade cyber safety assembly gives elementary students the information they need to make good decisions in their online lives. Through real-life experience as a juvenile investigator, the presenter will share common safety issues and how students can make themselves more secure in social networks.

7th - 12th Grade

The 7th – 12th grade cyber safety assembly builds off of the 4th – 6th assembly. The presenter, a former juvenile investigator, will take the topics one step further and discuss online sexual exploitation, sexting, criminal harassment and threats, how to respond to these issues, and how to create a positive online reputation.

Flexible Format Options

At Cyber Safety Cop, we understand that different educational settings require flexible options. That's why we offer three engaging formats for our Cyber Safety Presentations:

In-Person Presentations

Our dynamic presenters visit your school to deliver engaging and interactive Internet Safety Presentations that cater to the specific needs of each grade level. We create a safe space for students to ask questions and participate actively in their learning journey.

Live Webinars

With our live webinars, we can connect with your students remotely, allowing for a more flexible schedule and the possibility of reaching multiple classrooms simultaneously. Our experienced presenters will deliver the same high-quality content, engaging students in real-time interactions.

View-on-Demand Videos

Our professionally produced videos provide the same valuable content as our in-person presentations and live webinars. This option allows your school to offer internet safety training on your preferred schedule, making it accessible to all students, whether in the classroom or at home.
