

Assembly for Students

The safety and well-being of our students are of paramount importance. In response to the alarming rise in teen vaping, marijuana use, and fentanyl-related deaths, we present an eye-opening 45-minute assembly for students in 6th through 12th grade.

This thought-provoking session addresses the dangers of teen vaping, marijuana, and fentanyl use in the United States, empowering students with the knowledge to make informed choices for a healthier future.

What Students Will Learn

Vaping: The Hidden Dangers

Explore the dangerous reality of teen vaping and dispel common myths surrounding e-cigarettes. Our assembly will reveal the harmful effects of vaping on respiratory health and the risks of nicotine addiction.

Marijuana: Dispelling Myths

Challenge preconceived notions about marijuana and its derivatives. Through current scientific research, students will gain insights into the effects of marijuana on the developing adolescent brain.

Fentanyl: The Silent Killer

Address the grave dangers of Fentanyl overdose deaths and the rise of counterfeit prescription drug use. Students will learn about the heartbreaking consequences of taking seemingly harmless pills laced with deadly Fentanyl.

Empowering with Knowledge

Our assembly empowers students with information to make informed decisions about their health and well-being. We seek to guide our youth toward healthier choices by exposing the harsh realities of substance misuse.

Advocating for a Safer Future

Understanding the dangers of vaping, marijuana, and Fentanyl is crucial in combatting the drug overdose epidemic and safeguarding our youth. By raising awareness, we strive to reduce the devastating impact of substance abuse on our communities.

Why This Assembly Matters

Saving Lives Through Awareness

Drug overdose is the leading cause of death for young people, and Fentanyl has become the number one cause of drug overdoses. This assembly addresses these pressing issues head-on, seeking to prevent further tragedies.

Empowering Youth to Make Informed Choices

By arming students with the facts, we empower them to resist peer pressure and make informed decisions about their health and well-being.

Promoting a Healthier School Environment

School administrators and police officers are increasingly concerned about the sharp spike in vaping and marijuana use. This assembly is a powerful tool to foster a safer and healthier school environment.

Supporting Scientific Literacy

With accurate and up-to-date scientific research on the effects of vaping and marijuana on the adolescent brain, we promote scientific literacy among students.

Flexible Presentation Options

- 1. In-Person Presentations:** Our dynamic presenters visit your school to deliver an engaging and interactive presentation.
- 2. Live Webinars:** We can connect with your students remotely, allowing for a more flexible schedule
- 3. View-on-Demand Videos:** Our professionally produced videos provide the same valuable content as our in-person presentations and live webinars.
